

In this Issue:

Linking to Bible Text References

Church web sites often feature sermons, Bible studies and other documents that contain scripture references. While it's possible to manually link to an online Bible for each reference, there is a much easier way to accomplish the same thing.

The Logos company offers a free service that finds and tags scripture references on sites. When clicked, tagged references pop up a window with the text embedded. It's easy to add this on any netAdventist site site.

The screenshot shows a church website with a navigation menu at the top: Home, Newsletter, Calendar, Our Church, Our Pastors, and What. Below the menu is a welcome message: "Welcome to the Fairhill Seventh-Day Adventist church!". The main content area contains a paragraph about the Sabbath. A popup window is displayed over the text, showing the scripture reference "Exodus 20:8-11 (NIV84)" and the text: "8 Remember the Sabbath day by keeping it holy. 9 Six days you shall labor and do all your work, 10 but the seventh day is a Sabbath to the LORD your God. On it you shall not do any work, neither you, nor your son or daughter, nor your manservant or maidservant, nor your animals, ...". The popup also includes a "More »" link and a "Powered by RefTagger" footer.

To add reference tagging to your web site:

- Go to <http://www.reftagger.com> and click on "Get Reftagger"
- Customize the tagger to display your preferred Bible version and style.
- Select / copy all of the Javascript code displayed in the text box.
- Log into your netAdventist web site.
- Navigate to the "Settings" tab.
- Choose the Google Features settings

- Add the Javascript code you copied to the box provided to enter your Google Analytics code.
- It's okay to use the Google Analytics code box to add other external javascript references, but be careful not to overwrite your analytics code if you're using that feature!
